

## 23 ROOM DATA SHEETS

The Room Data Sheets describe requirements for each room. If there is any conflict between specialist reports and the described requirements, specialist reports are to be considered definitive.

Spatial relationships within and between Zones are summarised in the Functional Diagrams (S19). It is critical to provide efficient, secure circulation between these zones.

As previously noted, although the following Room Data Sheets quantify the physical requirements of the theatres, conceptual relationships and room sizes (particularly in the foyer area) are negotiable as the style and relationship of spaces are ultimately dependent on the final design.

The Facility Space Program (S18) provides the room number index to the room data sheets.

### 23.1 Room Data Sheet – Fields Interpretation

The following describes the intended interpretation of fields within the room data sheets. Fields that are self-evident are not described.

Boxes with a tick ☒ indicate a required feature. Unchecked boxes indicate 'NOT required'.

Regulatory, Disability Access, Occupational Health and Safety, Fire Rating and Fire Management requirements are not identified as they are determined by code application and the specific configuration of the building, and will be identified by relevant disciplines during design.

Specific Disability Access code requirements, e.g. tactile indicators etc, will be determined by Code and are not listed.

#### **A Architectural (all elements other than engineering and theatrical)**

A1 Area / Critical Dimensions – only critical dimensions or room areas are listed. Refer to the Facility Space Program generally for room areas. All dimensions or areas noted are *minimum* requirements.

A2 The primary type of activities to occur in the space. Secondary or tertiary uses may not be defined.

A3 Key functional requirements / design considerations that must be achieved.

A4 Occupants

Identifying numbers and types of occupants (public, centre staff, third party staff - such as Functions, F&B) indicating the functional occupancy the room is to support and with access and security implications relating to organisational access

Time of Use – typical range of time frames that zone will be in use. The standard working hours of the centre are 0800-2400.

Revenue-generating spaces – those that are hireable or which contribute specifically to revenue generation. Fitness for purpose and functionality of such spaces is critical and must not be compromised.

Contract / third party organisations – indicating where third parties have control over the space (eg F&B contractor) instead of TPAC administration

Library / Art Gallery / TRCM – space controlled by these entities.

A5 Enclosure / Relationships

Adjacency, views to and prohibited relationships between spaces.

Nature of enclosure – full, semi, external / outdoor.

Light control (daylight and artificial) and privacy requirements

## 23: Room Data Sheets

### A6 Access and Security

Direct vehicle access – to the space for deliveries, servicing, drop-off, etc.

CCTV required for security purposes, separate to CCTV for theatrical purposes.

Intercom activation – for remote entry control, control location(s) to be determined during design

Secure zone – capable of being secured separately to other areas/spaces

### A7 Acoustic Treatment

Noise isolation – to prevent noise intrusion on adjacent areas

HVAC noise control – to prevent HVAC noise impinging upon the use of the room

Room acoustic treatment – treatment of the room enclosure and services installations to provide an appropriate room acoustic characteristic and to be devoid of acoustic anomalies

Privacy / confidentiality – privacy required in relation to adjacent rooms

### A8 Floor Finishes

Slip resistant/safety – slip resistant or safety flooring to relevant standard or purpose

Resilient / sprung – either resilient flooring (eg counter stations), or sprung floors for physical activities, dance, rehearsal and the like for OH&S safety

Recess / set-down – floor structure recess for infills, eg floors sloping to wastes, cold rooms with insulated floors, set-downs for sprung flooring systems

Ceramic / stone / concrete – hard surfaces with long-term durability

Carpet – soft / carpeted surfaces (may include soft vinyls)

Water-proof – suitable for mopping or hose cleaning

Floor waste / trench – typically for floor or appliance drainage, eg kitchens

Coved skirting – typically to water-proof floors requiring robust cleaning, eg kitchens

Access floors / trenches – typically for infrastructure reticulation such as data / theatrical infrastructure services recessed into floors

### A9 Walls & Finishes

Washable – all walls should be washable except feature treatments where approved

Glazed – wall primarily glazed, such as glazed partitioning

Impact resistance – medium or high resistance

Impact resistant dado – screw fixed sacrificial layer added to walls (typically BOH corridors) to protect the wall and capable of removal and replacement as required

Corner guards – durable (steel) corner guards to high impact resistances wall corners, eg truck docks, BOH corridors

Graffiti resistance – wall surface to be inherently capable of repeated graffiti cleaning without loss of surface integrity and finish, or, applied, non-sacrificial treatment to wall for this purpose.

### A10 Ceilings

Feature treatment – architectural feature, retaining capacity to access services and ceiling elements (eg hanging points, lights) above the surface

Acoustic treatment – to provide suitable room acoustic performance, see A7

## 23: Room Data Sheets

	Suspended / accessible – either suspended surfaces, or accessible to above
	Hanging points / loads – provision of hanging / connection points in ceiling system
A11	Doors
	Vision panel – for safe access by personnel from either side, as per relevant Standards
	Grille / RSD / Servery – security grilles or roller shutter doors or servery openings
	Over-size – large or non-standard door sizes (width, height) to suit purpose
	Impact resistant – typically requiring half-height or full-height protective surface to door leaf where impacts are likely, eg delivery points, waste management, etc
	Operable / acoustic – either folding/retracting doors/walls, and/or with suitable acoustic treatment as defined by the acoustic design brief
A12	Windows
	Windows / daylight – glazed openings within walls whether internal or external
	Obscure / translucent – either glass type or applied film providing vision reduction
	Blinds – typically internal blinds fitted to glazed openings for glare or privacy control
A13	Fixed Fittings – elements fixed to the building structure
A14	Fixed Equipment / Appliances
	Items either fixed, hard-wired or needing electrical or hydraulic services
A15	Furniture, Equipment, Signage
	Loose furniture / equipment or signage (which may be fixed)
	Statutory signage is not identified as it is a given.
A16	General or additional notes
<b>B</b>	<b>Building Engineering</b>
B1	Theatrical technology
	Refer to detailed theatrical requirements in the Brief and in subsequent development of the design brief.
	Paging / sound systems – paging or audio systems infrastructure
	CCTV (SM) – video data for stage management purposes
B2	Structural load capacity
	Unusual structural requirements / loads to be incorporated in the design
B3	Power
	All GPOs to include USB points unless otherwise approved
	Audio power – dedicated electrical power network for audio devices only, earthed separately to the general power circuit system
	Floor trenches / boxes – power and data services recessed into floors
	Ducted skirting – power, data services, GPOs integrated into reticulated skirting
	Master switch – capacity for master control of designated service
B4	Lighting

General / house – lighting for general room usage, 'house' lighting

Cleaning / working – lighting for cleaning or working use

Blue / low brightness – blue lights for BOH entries to performances spaces, low brightness fittings for exhibition / display or other purposes

Zoned control – lighting controlled in banks of effective zones of fittings

Local control – capable of control from within the room

Movement detection – automated switching on/off, eg for energy efficiency

Task / make-up – suitable lighting levels for focused tasks, colour spectrum & distribution for tasks such as making-up

Specialised – may include architectural effects lighting or as noted

B5 Communications

Hearing augmentation – fixed or mobile system

WiFi – public access to be generally available throughout the centre of adequate capacity for full occupancy engaging in social media use, etc.

B6 Heating, ventilation, Air-conditioning (HVAC)

Air-conditioning – heat and cooling temperature control, assumes supply and extract ventilation

Heating – when no air-conditioning required/relevant

Supply or exhaust ventilation – ventilation without air-conditioning

Fume / dust extraction – specialised provision eg photocopiers, cooking, machinery

Local control – of HVAC systems to enable their control for special uses, such as during performances

B7 Transport - passenger lifts, monorail or hoist, dumb waiter services as identified (refer B10).

B8 Hydraulic – reticulated water, sewer, gas services

Hot / chilled water – hot or chilled as noted

B9 Fire Detection / Protection

Requirements above/beyond regulatory requirements

B10 Any other building services requirements

	Room / Space Name:	<b>RDS NO: 101</b>		
	<b>FORECOURT – PEEL STREET</b>	<b>ZONE: 100</b>		ISSUE: A Date: 08/02/21
		<b>OYBS Ref: 1.6.3</b>		<input checked="" type="checkbox"/> required feature <input type="checkbox"/> feature NOT required Ctrl Tab - insert a tab within a cell
<b>A</b>	<b>ARCHITECTURAL</b>			
<b>A1</b>	<b>Area / Critical Dimensions:</b>	Length: m Width: m	Working height: 6m min Ceiling height: m	Minimum area: m <sup>2</sup>
	A1 Notes:	Clear working height of 6m for tall temporary structures, suspended items		
<b>A2</b>	<b>Activity Description:</b>	Strongly identified unobstructed entries to both Library / Art Gallery and TPAC. Encourage community gathering and habitation of the building frontage. Create a habitable and comfortable ambience for centre and forecourt users – avoid wind, glare, provide weather shelter. Furniture and fixed elements must not obstruct capacity for gatherings, performances. Close proximity to short stay parking and vehicle drop-off, pick-up.		
<b>A3</b>	<b>Key Functional Requirements &amp; design considerations:</b>	Capacity to support events, displays, performances, 3-D art works <ul style="list-style-type: none"> <li>▪ Café outdoor seating for 50 persons, sheltered, standalone when theatres closed, relocatable</li> <li>▪ Bar external service counter, liquor license</li> <li>▪ Performance technology infrastructure, OB van connections.</li> <li>▪ Ground &amp; wall anchors for rigging ground and aerial features – sails, banners, marquees</li> <li>▪ Open space suitable for performances and associated gatherings.</li> <li>▪ Integrated accessible access preferably 1:20 walkways not ramps.</li> <li>▪ Bicycle parking with oversight</li> </ul> Ideally extend plaza into parking zone and across Peel Street to maximise area for festival events.		
<b>A4</b>	<b>Occupants:</b> Type and number of occupants Controlled by third party / contractor	<input checked="" type="checkbox"/> Public maximise capacity <input type="checkbox"/> Centre Staff <input type="checkbox"/> Third party	<b>Time of Use:</b> 24/7	<input checked="" type="checkbox"/> Revenue-generating <input type="checkbox"/> Contract / third party / other <input type="checkbox"/> Library / AG / TRCM

	<b>AUDITORIUM – PROSCENIUM THEATRE</b>	<b>ZONE: 500</b>		ISSUE: A Date: 08/02/21
		<b>OYBS REF: 5</b>		<input checked="" type="checkbox"/> required feature <input type="checkbox"/> feature NOT required
<b>A</b>	<b>ARCHITECTURAL</b>			
<b>A1</b>	<b>Area / Critical Dimensions:</b>	Length: Max 25m Width: Max 22m	Working height: Ceiling height: multi-storey	Minimum area:
	A1 Notes:	To enhance audience-actor relationship and intimacy design for: <ul style="list-style-type: none"> <li>▪ Shortest possible length of sightline from stage front to rear seating row</li> <li>▪ Seating in curved rows not straight</li> </ul>		
<b>A2</b>	<b>Activity Description:</b>	Audience seating area of proscenium theatre, entry and access for patrons, efficient circulation by patrons and staff (ushers, cleaners, technician, etc). Providing excellent audience experience of engaging with a performance / event presentation, with intimate, warm and welcoming character. While architecturally high quality, the architecture should not compete with the event or production design. Refer to the FTDB for more detail. Includes permanent Audio Mix Position		
<b>A3</b>	<b>Key Functional Requirements &amp; design considerations:</b>	<p>Maximum number of seats with excellent unobstructed sightlines – probable requirement for balcony seating Excellent seating comfort, row spacing min. 1.0m. Quick removal of seats Best practice disability access and seating layouts in multiple locations. Large numbers of removeable seats in key rows such as cross-aisles at orchestra pit, wheelchair seating locations Aisles located to sides, <u>not</u> on centreline. Excellent room acoustics devoid of echoes, flutter or focusing for natural and amplified acoustics. Room functionality and acoustic performance to be determined by theatre consultant and acoustic consultant respectively.</p> <p><b>Audio Mix Position:</b> Mix position at rear of stalls in addition to seating area. Minimum area 3m wide x 2.4 m deep, without requiring seat removal at centre rear of the auditorium, forward of control room Cabling infrastructure to accommodate control position Excellent listening position representative of auditorium acoustics (avoid acoustic anomalies) Direct line of sight to all speakers around the proscenium to accurately balance sound Access from the rear to avoid disruption to patrons on either side of the mixing desk and for equipment and wheelchair access.</p>		
<b>A4</b>	<b>Occupants:</b> Type and number of occupants Controlled by third party / contractor	<input checked="" type="checkbox"/> Public 600 no. <input checked="" type="checkbox"/> Ctre Staff 8-10 users <input type="checkbox"/> Third party	<b>Time of Use:</b> 0800-2400	<input checked="" type="checkbox"/> Revenue-generating <input type="checkbox"/> Contract / third party / other <input type="checkbox"/> Library / AG / TRCM
	A4 Notes:	600 seats total including DDA positions and companion seats, <u>not</u> including seating rows on orchestra pit (these 2-3 part rows are in addition to 600 seat total) or at the Audio Mix Position. Additional ushers seats near each venue entry lock, number to be confirmed in design.		
<b>A5</b>	<b>Enclosure, Relationships:</b>	Adjacent to: View to: Acting area, pit Prohibited:	<input checked="" type="checkbox"/> Fully enclosed <input type="checkbox"/> Semi-enclosed <input type="checkbox"/> External	<input checked="" type="checkbox"/> Black-out <input checked="" type="checkbox"/> Brown-out <input type="checkbox"/> Privacy required
	A5 Notes:	Direct audience DDA access to stage within room.		
<b>A6</b>	<b>Access &amp; Security:</b>	<input type="checkbox"/> Direct vehicle access	<input type="checkbox"/> CCTV (security) <input type="checkbox"/> Intercom activation	<input checked="" type="checkbox"/> Secure zone <input type="checkbox"/> Control not required

		<b>OYBS Ref: 8.6.1</b>		<input checked="" type="checkbox"/> required feature <input type="checkbox"/> feature NOT required
<b>A</b>	<b>ARCHITECTURAL</b>			
<b>A1</b>	<b>Area / Critical Dimensions:</b>	Length: m Width: m	Working height: m Ceiling height: m	Minimum area: m <sup>2</sup>
	A1 Notes:			
<b>A2</b>	<b>Activity Description:</b>	Dressing Rooms are the 'working office' for performers and whilst touring is also their 'home away from home'. They should therefore provide high levels of amenity and comfort. Spaciousness and acoustic treatment for vocalisation / performance warm-up is essential. Desirable if performers are able to comfortably 'nap' in the dressing room.		
<b>A3</b>	<b>Key Functional Requirements &amp; design considerations:</b>	<ul style="list-style-type: none"> <li>▪ Quiet, accessible and comfortable</li> <li>▪ Acoustic treatment</li> <li>▪ Adjacent to ensuite bathroom</li> <li>▪ Full disability access.</li> <li>▪ Easy access to stage. Highly desirable to be located at stage floor level.</li> </ul>		
<b>A4</b>	<b>Occupants:</b> Type and number of occupants Controlled by third party / contractor	<input type="checkbox"/> Public <input type="checkbox"/> Ctre Staff <input checked="" type="checkbox"/> Third party 6-8 no.	<b>Time of Use:</b> 0800-2400 hrs	<input type="checkbox"/> Revenue-generating <input type="checkbox"/> Contract / third party / other <input type="checkbox"/> Library / AG / TRCM
