

Tamworth Intermodal Rail Line

The NSW Government is reactivating five kilometres of non-operational rail line between West Tamworth and Westdale. Reactivation of the rail line will allow rail access to the Tamworth Regional Freight Terminal to be located near Goddards Lane. The project is funded by the Restart NSW Fund.

Main construction works started in January 2021 and is scheduled to finish in late 2021.

Upcoming work

Work will continue in August, weather permitting, and includes:

- civil and track works at each end of the rail line project at West Tamworth Yard and near Goddards Lane
- installation of lights and booms at the level crossings (all warning devices will be covered until activation of the rail line later this year)
- start of utility adjustment works adjacent to the rail corridor by Essential Energy.

Equipment to be used includes excavators, loaders, smooth drum rollers, franna cranes and hand tools.

Hours of work

Construction will be carried out **Monday to Friday from 7am to 6pm** and **Saturday from 8am to 1pm**.

Keeping our employees and communities safe

Transport for NSW is working with our operators and contractors to ensure the Public Health Order to pause construction in Greater Sydney from Monday July 19 is adhered to in a safe manner.

Regional worksites are required to have a COVID-Safe plan in place and will continue to comply with all directives from NSW Health.
